

THE ZOO IS COMMITTED TO ADDRESSING THE MOST SIGNIFICANT AND EMERGING THREATS TO WILDLIFE TODAY.

JOIN US TO SECURE A FUTURE FOR WILDLIFE

Working with conservation partners in more than a dozen countries around the world, the Zoo is tackling today's most complex and pressing human-wildlife conservation issues.

We develop and implement unique and collaborative projects that directly address wildlife survival and benefit local people.

The Zoo has been working to secure a future for wildlife around the world for the past two decades and committed more than 7 million dollars to global wildlife conservation efforts since 1995.

We have a responsibility to protect wildlife for future generations.

Wildlife around the world is threatened by habitat loss, illegal trade, and conflict with humans.

Join our efforts to protect wildlife.

The Zoo's Future for Wildlife Program

Cleveland Metroparks Zoo works to secure a future for wildlife around the world by addressing human-wildlife conservation issues that threaten species survival. We leverage science, education, and strategic partnerships to protect species in the wild, empower conservationists in the field, and build conservation capacity.

Many animals around the world - including tigers, elephants, rhinos and slow loris - are in danger of disappearing in our lifetime.

Join our efforts to protect wildlife threatened by illegal trade.

Giraffe numbers have decreased by nearly 40% in the last 15 years.

Join our efforts to study giraffe populations and investigate the causes of their decline.

More than half of Asia's turtle species are threatened with extinction.

Join our efforts to stop the uncontrolled collection of turtles from the wild.

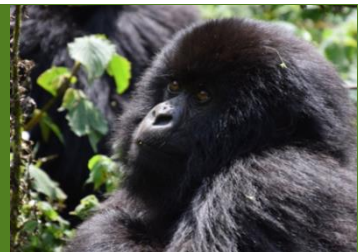

Andean bears and their habitats are disappearing.

Join our efforts to strategically study and monitor bear populations and habitats.

Fewer than 4500 eastern gorillas remain in the world.

Join our efforts to protect gorillas from habitat loss and poaching.

Lion and cheetah populations have decreased by more than 40% in the last 20 years.

Join our efforts to reduce human-carnivore conflict.
